

# Gauges

## Ordering Information

### Liquid Filled Gauge Ordering Information

Our goal is to assist you in ordering the correct gauge the first time and every time. By following the guidelines below we can quickly and easily find the part number required.

1. Determine the size requirement according to the diagrams below.
2. Determine the pressure range and unit of measure required.
3. Determine the dial color — black or white.
4. Determine the inlet location — back or bottom (stem).
5. Do you need a Liquid Filled, Dry, or Illuminated gauge?

If you have additional questions, call the Class 1 Sales Team at 800-533-3569
