

*Instructions: Insert the following paragraphs into your specifications to ensure that your new apparatus is equipped with class 1 components*

### **Digital Pressure Gauge**

All pump intake and pressure indicating instruments on the apparatus shall be digital pressure gauges supplied by Class I. The digital pressure gauge display shall be a waterproof display with super-bright digits at least 1/2" high.

A weatherproof transducer (transmitter) shall be supplied and mounted in the appropriate location in the piping system. The individual transducers shall be connected to each readout at the pump panel using the appropriate wiring in strict accordance with the instructions supplied by Class I.
